The Committee appointed at the Monthly Meeting in first Mo last on the very interesting subject of the education of our youth as impressively handed down in the Extracts for the special attention of Quarterly and Monthly Meetings Report.

That they have given much attention to the subject, and believe friends generally feel an increased interest in the concern for the establishment of select schools, under the care of our Monthly Meeting; it is with regret we find many concurring circumstances which have had a tendency to prevent an immediate movement therein, we however trust there is a living concern resting upon the minds of many friends to cherish this very important work of giving to our dear children an education more conformable to our profession than many of them are now receiving. And altho obstacles have presented to the establishment of a suitable school amongst us, we hope the time is not distant when it will be accomplished, feeling thus impressed with the importance of the subject we greatly desire that friends may continue an increased attention thereto, and persevere in a hearty determination to do all they can speedily to promote a measure on which we believe there can be no doubt the prosperity of truth among us very much depends as well as the temporal comforts and future welfare of ourselves.
